

HTML DOM Code Object

[« Previous](#)

[Next Reference »](#)

Code Object

The Code object represents an HTML `<code>` element.

Access a Code Object

You can access a `<code>` element by using `getElementById()`:

```
var x = document.getElementById("myCode");
```

[Try it](#)

Create a Code Object

You can create a `<code>` element by using the `document.createElement()` method:

```
var x = document.createElement("CODE");
```

[Try it](#)

Standard Properties and Events

The Code object also supports the standard properties and events.
